### PROFILE

As a dedicated and innovative software developer, my objective is to leverage my technical expertise, problem-solving skills, and passion for coding to contribute to cutting-edge projects. I aim to collaborate within a dynamic team, utilize my technical skills to create robust, and user-centric software solutions.

### EDUCATION

**BE in Computer Engineering**, KJ Somaiya College of Engineering 2022-present  
CGPA: 8.55 | Jt Tech Head of CSI-KJSCE

**Greenlawns High School,**

Achievement: Head Boy

### SKILLS

**Languages:** JavaScript , Python, Java, HTML, CSS,  
**Frameworks:** React, MongoDB, ExpressJs, NodeJs, React-Native, Firebase  
**Soft Skills** Leadership, Teamwork and collaboration, Adaptability, Communication.

### EXPERIENCE

**Freelancer** | ([Demo link](#)) July 2022 - Present  
Divine Solitaires

- Served as a Full Stack Developer, contributing expertise in crafting captivating digital experiences.
- Innovatively designed and executed a captivating **landing page** for the company's ecommerce website, enhancing brand visibility and engagement.
- Skillfully contributed in the development of the brand's **mobile application** using **React Native**, delivering seamless user experiences across platforms. Additionally, spearheaded the creation and deployment of newsletters, effectively driving customer engagement and retention.
- Consistently demonstrated a keen eye for detail and a commitment to exceeding project goals in a dynamic, deadline-driven environment.

**Frontend Developer** January 2024 - February 2024  
Techplement

- Developed a dynamic and user-friendly resume generator website as part of a frontend development internship at Techplement, using React.

**Frontend Developer** | ([Github Link](#)) July 2023 - August 2023  
KJ Somaiya College of engineering

- I spearheaded the development of a user-centric website designed to streamline essential tasks for faculty and students alike. This innovative platform revolutionized the academic experience by providing detailed, personalized, and confidential reports on academic performance.
- Through meticulous design and implementation, I ensured that users could access valuable insights into their educational journey with ease and confidentiality.

### FULL STACK DEVELOPER

Mergrr  
Mergrr is an online dating app developed entirely by me, aimed at professionals seeking long-term relationships. I built essential features like user registration, profile management, and real-time chat.

- Key Features: User authentication, profile customization, real-time chat (included features like block and report).
- Tech Stack: Developed using Flutter for the front end and Firebase for backend services and real-time data synchronization.
- Target Audience: Professionals looking for serious relationships and long-term commitments.

Tech stack: Flutter and Firebase

## PROJECTS

---

### SIH(Hackathon)| ([website link](#) , [github link](#))

- Led a dynamic team of 8 to craft a revolutionary website addressing student mental health.
- We built a personalized chat system connecting students with psychiatrists, integrated with soothing meditation features and uplifting music. Elevating well-being, one click at a time.

*Tech stack: HTML, CSS, JavaScript, Firebase*

### Datathon (Hackathon)| ([website link](#) , [github link](#))

- With a team of four we developed NutriCraft: an advanced software solution for precise calorie tracking and comprehensive nutrition analysis.
- Leveraging Gemini's Vision API, our innovative platform also generates recipes effortlessly from captured ingredient images. Committed to promoting holistic health through cutting-edge technology.

*Tech stack: React, Firebase, Firestore, Gemini Vision API*

### SocioConnect | ([github link](#), [Demo Link](#))

- Engineered a global networking platform facilitating seamless interaction and collaboration among developers worldwide.
- Empowering the exchange of ideas and fostering constructive feedback to drive innovation and excellence in the developer community.

*Tech stack: React, MongoDB, Express, Node, Redux*

### Devopia (Hackathon) | ([github link](#))

- Designed and developed a comprehensive financial management solution, integrating PLAID API for seamless access to bank account balances.
- Additionally, implemented features enabling users to effortlessly monitor Relative Strength Index (RSI) of any stock. Demonstrated proficiency in enhancing user experience and delivering innovative solutions in the financial technology sector.

*Tech stack: React, Firebase, Firestore*
